Summery

Motivated Frontend Developer with in-depth knowledge of React, JavaScript, and Python. Skilled in developing, optimizing and reworking systems to meet specific customer requirements. Expertise in writing codes in various languages and developing flowcharts.

Professional Summary

- Having 2.5 years of IT Experience as a React JS Developer with 2.5 years of experience in developing dynamic, responsive, and user-friendly Single Page Applications (SPAs) using React JS, Redux, and JavaScript ES6+. Strong expertise in building reusable components and integrating third-party APIs, with a focus on optimizing performance and ensuring cross-browser compatibility. Adept at collaborating with cross-functional teams using Agile methodologies, providing technical solutions, and contributing to continuous integration and delivery (CI/CD) processes. Experienced in implementing responsive UI designs using Tailwind CSS, HTML5, and CSS3, ensuring mobile-first and accessible web applications that meet WCAG standards.

Skills

Languages: JavaScript, HTML, CSS, Python.

Frontend: React.js, React Router, JavaScript (ES6+),HTML5,CSS3 ,Tailwind CSS, Bootstrap ,TypeScript

Software Tools : Vercelli, Jira, Firebase, Git, Postman ,Chrome dev tools, Figma.

Database : MongoDB

Experience

Algoman IT – Mumbai, India 12/2022 - Current

Role: Software Engineer

Technologies used: React JS, Storybooks, Material UI controls, CSS, Html , JavaScript

Project Details: User-Management Employees

At Algoman IT, I developed and maintained a User Management System as part of a larger dashboard application. This module allows administrators to seamlessly create, view, edit, and delete users through an intuitive and responsive interface we can manage the employees activities like Admin ,Export ,Import and accessing branch management and user management

Responsibilities:

- Enhanced application performance by 15% through optimization in React.js based web applications.
- Designed and implemented responsive user interfaces, leading to a 20% increase in user engagement
- Integrated backend services with frontend workflows for 5+ enterprise applications.
- Built navigation functionalities using React Router for multi-page applications.
- Streamlined deployment processes, achieving a 30% efficiency boost through CI/CD pipelines
- Managed version control for 10+ projects using Git and GitHub, ensuring collaborative efficiency.
- Developing and reviewing test cases for conducting Unit & System Integration Testing. Performing code reviews.
- Contributing in different ceremonies like sprint planning, sprint retro, sprint demo, and sprint Grooming for projects using the Agile/Scrum methodologies.
- Providing various technical suggestions, solutions, and troubleshooting assistance during development and deployment of applications.
- Developing Single Page Applications using Web Development Tools such as React JS and Node JS.
- Designing and developing websites using HTML5, CSS3, Bootstrap, JavaScript, jQuery, and React JS that meet accessibility and web browser standards for the website.

Sky Scanner – Remote, India 08/2022 - 10/2022

Role: Web developer intern

Technologies used: React.js, Node.js, HTML, CSS, Bootstrap

Project Details: Fully functional website During my internship at Afame Technologies, I worked on a data visualization and user dashboard project, focusing on building interactive and responsive UI components using React.js, Tailwind CSS, and Chart.js, and managing Backend frameworks and libraries

Responsibilities:

- Developed and styled custom dashboard components to display real-time data and analytics using charts and graphs.
- Designed visually appealing cards and layouts to present metrics, making complex data easy to interpret.
- Collaborated with the backend team to integrate APIs, ensuring seamless data flow and real-time updates across components.
- Involved in Functional testing, business requirement testing, data requirement testing, regression testing, system integration testing, data validation, and non-functional testing.
- Ensured code readability and maintainability by following best practices in React component structuring and styling with Tailwind
- Provide demos/walk through regarding testing results.
